REACH Supplier Confirmation – SVHC Candidate List

Dear Supplier

REACH regulation (EC 1907/2006) sets a number of new obligations along the supply chain in particular for Manufacturer/Importers with respect to the use of chemical substances subject to registration.

The European Chemicals Agency (ECHA) added several substances to the SVHC candidate list¹

Article 31 (c) of REACH regulation referring to article 59 (1) regarding the identification of SVHC substances. Furthermore article 33 regulates the duty to communicate that information along the supply chain:

1. Any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

2. On request by a consumer any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w) shall provide the consumer with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.

The relevant information shall be provided, free of charge, within 45 days of receipt of the request.

Raw materials which we receive from your company must not contain any SVHC substance at a concentration above 0.1% w/w, unless specified and communicated in your material safety data sheet. We refer to Article 31 and 59 REACH regulation.

We appreciate much your timely confirmation.

Thanks and best regards

Selectchemie AG
